

Kindergarten Adaptions

February: Print out the worksheet of prepared valentines. Let students try to find pictures of the correct vegetables in the seed catalogue and cut them out and paste them on the valentine. Have students color the valentines and address them!

March: Instead of having students create vegetables out of colored paper, have students color and cut out the vegetables in the printout. Divide the class into 5 groups and give each group a vegetable to color/cut. See if students can cut carefully along the lines of their vegetable! Have some students work on the “base” – the soil, worms, sun, and clouds. You will need to prepare the poster board by pasting brown construction paper along the bottom third to represent the soil.

August: See alternative worksheet with simpler questions.

September: See alternative worksheet and alternative craft. Instead of having students create the parts of the pumpkin out of colored paper, have students color and cut out the elements in the printout. Divide the class into 5 groups and give each group an element to color/cut. See if students can cut carefully along the lines! You will need to prepare the poster board by pasting brown construction paper along the bottom third to represent the soil.

October: See alternative worksheet

November: See alternative worksheet

If you
CARROT all,
 you'll be my
 Valentine!

Paste a picture of
CARROTS
