### Additional Procedures

- Individuals that are sick are asked to please stay home and not attend volunteer activities.
- Disposable Face Masks will be available for volunteers, although we recommend that volunteers bring their own facemasks.
- Gloves will be washed using hot water and dried using an electric dryer on high heat between each volunteer group.
- All tools will be sanitized using a bleach solution before and after each volunteer group.
- Guidelines will be reviewed with volunteer groups at the beginning of each session, with reminders during our time in the gardens.
- Due to the additional stress that working outside while wearing a mask brings, volunteer opportunities will be limited to 1.5 hours or less for each session for the health of all of our volunteers.
- Volunteers are asked to bring their own water and water bottle since we won't be able to provide a community water cooler.
- All guidelines are subject to change as we continue to learn the best practices needed to keep our community safe and healthy.
